Continuing the evolution of
Ness D-series ...

DPlus Multi-Zone Platform

The Ness DPlus alarm control panel platform offers unparalleled flexibility with a myriad of configuration options available to the installer and user.

Start with 8 zones and add the 8 zone expander making a 16 zone panel without zone-doubling.

Add the 16 zone remote expander to build a de-centralised 32 zone system without running all zones back to one location.

Or install the 24 zone expander for 24 discrete zones at the main board.

No matter how many hardwired expanders are installed, you always have 32 wireless zones compatible with Ness one-way and two-way radio interfaces and peripherals.

8 ZONE SYSTEM

EXPANDABLE TO 16 or 24 ZONES

Shopping List

106-981-P DPlus 8 Zone Base Panel inc Plug Pack & Batt
